
10 **FUTURE FOCUS** How can we induce people and institutions to think in terms of the long-range future, and not just in terms of their short-range selfish interest? How can we encourage people to develop their own visions of the future and move more effectively toward them? How can we judge whether new technologies are socially useful — and use those judgments to shape our society? How can we induce our government and other institutions to practice fiscal responsibility? How can we make the quality of life, rather than open-ended economic growth, the focus of future thinking?
