Climate Summit / United Nations

<https://www.un.org/en/climatechange/un-climate-summit-2019.shtml>

UN Climate Action Summit 2019

- Accelerating the shift away from fossil fuels and towards renewable energy, as well as making significant gains in energy efficiency;

- Mobilizing public and private sources of finance to drive decarbonization of all priority sectors and advance resilience;

- Transforming industries such as Oil and Gas, Steel, Cement, Chemicals and Information Technology;

- Reducing emissions, increasing sink capacity and enhancing resilience within and across forestry, agriculture, oceans and food systems, including through biodiversity conservation, leveraging supply chains and technology;

- Advancing mitigation and resilience at urban and local levels, with a focus on new commitments on low-emission buildings, mass transport and urban infrastructure; and resilience for the urban poor;

- Advancing global efforts to address and manage the impacts and risks of climate change, particularly in those communities and nations most vulnerable.
